SUMMARY

Full Stack Engineer with experience building production financial workflows, AI product interfaces, real-time systems, and cloud-deployed applications. Strong in React, TypeScript, Node.js, API design, WebSockets, authentication, databases, and responsive UI design, with hands-on AI product work using Sarvam AI, Gemini, Claude, and Codex agent skills.

SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL
- **Frontend:** React, Next.js, Oracle JET, Tailwind, Shadcn
- **Backend:** Node.js, Express, REST APIs, WebSockets, JWT, OAuth, Zod, MongoDB, Postgres, Prisma, Cloudflare Workers
- **AI and Real-Time:** Sarvam AI, Gemini AI, Claude, Replicate, Codex Agent Skills, LiveKit, Mediasoup SFU
- **Cloud and Tools:** AWS S3, CloudFront, EC2, Docker, Redis Queues, Redis Pub/Sub, DigitalOcean, Git

EDUCATION

- **National Institute of Technology** Rourkela, India
Bachelor of Chemical Engineering; CGPA: 7.71/10.0 December 2020 - April 2024

EXPERIENCE

- **Oracle Financial Services** Bangalore, Karnataka
Application Developer 1 Sept 2025 - Present
 - **Tech Stack:** Oracle JET, JavaScript
 - Owned frontend development for a new Cashflow Transaction module using Oracle JET, building the UI from scratch, integrating service APIs, and implementing multi-step transaction workflows.
 - Integrated backend service APIs into existing transaction flows while preserving backward compatibility across production financial workflows.
 - Optimized API interactions by reducing redundant service calls and improving response performance across UI and service layers.
 - Resolved high-priority production defects in client-facing financial workflows, improving reliability and reducing business impact.
 - Created Codex agent skills for team-specific development workflows, reducing turnaround time for large user stories from weeks to days and driving AI adoption within the team.
 - Led Git workflow adoption by standardizing branching practices and improving collaboration across backend, framework, and QA teams.
- **Bharat Aluminium Company** Korba, Chhattisgarh
GET, Commissioning, Potline 3 Jan 2025 - Sept 2025
 - Led inspections of structural and electrical components, coordinated with project and third-party teams, and improved technical documentation during potline commissioning.
 - Supported megger testing, anode change processes, manpower planning, and Critical Risk Management workflows during production-readiness activities.
- **Xsquare Labs (Coldbean AI)** Remote, Canada
Full Stack Developer - Freelance Aug 2024 - Sep 2024
 - **Tech Stack:** React, TypeScript, Shadcn, Tailwind, Node.js, Express, MongoDB, Redux, Zod, OAuth, RapidAPI, Apify
 - Built production-ready dashboard, chat UI, and AI result table from Figma designs with responsive styling and reusable frontend patterns.
 - Integrated Redux and WebSockets for state-driven real-time chat updates across AI workflows.
 - Implemented Google OAuth, Zod input validation, and session flows for authenticated product experiences.
 - Developed modular backend APIs to fetch and serve AI-enhanced content using third-party data sources including Twitter, Crunchbase, and Google Maps.
- **Persana AI (YC W23)** Remote, SF Bay Area
Frontend Intern Feb 2024 - Apr 2024
 - **Tech Stack:** React, TypeScript, Zustand, Tailwind, Chakra UI, TanStack Router, MongoDB
 - Refactored and migrated legacy frontend features into a modern modular React and TypeScript codebase.
 - Built additional UI modules for core product workflows while working with startup-speed product requirements.
- **Larsen and Toubro Energy Hydrocarbon** Powai, Mumbai
Software Development Engineer Intern May 2023 - July 2023
 - Reduced cable routing time from 25 days to 1 hour using Python, Dijkstra's algorithm, graph models, ezdxf, and networkx.
 - Built a user manual generator with CRUD operations, stored procedures, and ADO.NET on ASP.NET MVC, saving 1-2 developer days per project.

PROJECTS

- **VitalFlow**

- **Tech Stack:** React, Tailwind, LiveKit, Node.js, TypeScript, Sarvam AI, Gemini, WebSockets, AWS S3, CloudFront, EC2
- Built a voice-first healthcare assistant with a patient-facing frontend for voice chat, appointment booking, doctor discovery, document context, and real-time AI responses.
- Integrated Sarvam AI for speech-to-text using **saaras:v3** and text-to-speech using **bulbul:v3**, enabling natural voice interaction and language-aware patient conversations.
- Designed responsive chat and call screens with animated voice states, doctor result panels, audio playback, microphone recording flows, and smooth UI feedback.
- Deployed frontend on AWS S3 with CloudFront CDN distribution and backend on AWS EC2.
- **Links:** Frontend | Backend | Demo

- **Lithouse**

- **Tech Stack:** Mediasoup, WebSockets, Redis Queues, Docker, DigitalOcean, Claude, Replicate, OAuth, Razorpay, AWS SES
- Built N:N video call infrastructure using Mediasoup SFU with WebSocket-based real-time chat and movement sync.
- Designed queue-worker architecture using Redis Queues and deployed Dockerized microservices on a single DigitalOcean Droplet to reduce infrastructure cost.
- Integrated Claude for prompt refinement, Replicate for AI image generation, Redis Pub/Sub for training updates, and DigitalOcean Spaces for image storage.
- **Code:** GitHub

- **Generoid**

- **Tech Stack:** Next.js, TypeScript, Shadcn, Tailwind, Gemini AI, Postgres, Prisma, NextAuth
- Built a full-stack AI assistant that generates frontend UI components through chat with real-time Gemini responses, Google OAuth, and persisted user sessions.
- **Code:** GitHub

- **Real-Time Investment Tracker**

- **Tech Stack:** React, TypeScript, Serp API
- Developed a finance tool where users upload Excel holdings, view live stock values through Serp API, and edit holdings in-app.
- **Code:** Frontend | Backend

ACHIEVEMENTS

- **Top 50 Finalist:** Google Agentic AI Hackathon 2025, selected from 70,000+ developers across India
- **Top 50 Finalist:** TATA Elxsi TELIPORT Hackathon 2023, All-India
- **Top 10 Finalist:** Dr. Reddy's Aspire Challenge 2023, All-India
- **Podcast:** Invited to Harkirat Singh's podcast, 561K+ subscribers. YouTube
